About Me

Soon-to-be graduate frontend developer with a strong interest in creating user-friendly digital solutions. I'm structured, solution-oriented, and communicative, and I thrive both in teams and working independently. With a keen eye for detail, curiosity, and flexibility, I'm ready to take the next step in a role where I can combine creativity with technical skills.

Work Experience

Nexer grop

Frontend Developer Intern | 2024 - Present

Currently working with frontend development using Next.js, TypeScript, SCSS, and Zustand. During my internship, I've contributed to launching a new project, focusing on everything from building reusable and modular components to syncing frontend with backend. I work in an agile team and actively participate in standups, code reviews, and sprint planning. For version control, pull requests, and managing user stories, we use Azure DevOps.

Hornbach

Team Leader | 2023

This role gave me valuable experience in team leadership and quick problem-solving in dynamic environments. I developed strong organizational skills, managed product flow, and communicated efficiently with colleagues. I was also responsible for onboarding new employees and implementing new work routines, which strengthened my leadership and problem-solving abilities.

Other Work Experience | 2017 - 2022

Since 2017, I have consistently held full-time positions or worked alongside my studies. My previous roles include waitress, animal caretaker, sales associate, childcare worker, and goods receiver.

Education

NBI / handelsakademin

Frontend Developer | 2023 - Present
