About Me

I have a passion for creating user friendly and accessible digital solutions. I am structured, solution oriented and communicative, and I enjoy working both independently and in a team. I pay attention to detail, have a humble attitude and a strong curiosity for new technology. I am ready to take the next step in a role where I can combine creativity with technical skills.

Work Experience

Nexer AB

Frontend Developer Intern | November 2024 – June 2025

Worked with frontend development using Next.js, TypeScript, SCSS, and Zustand. During my internship, I contributed to launching a newsletter builder tool, focusing on everything from building reusable and modular components to syncing frontend with backend. I was part of an agile team and actively participated in standups, code reviews, and sprint planning. For version control, pull requests, and managing user stories, we used Azure DevOps.

Hornbach

Team Leader | 2023

This role gave me valuable experience in team leadership and quick problem-solving in dynamic environments. I developed strong organizational skills, managed product flow, and communicated efficiently with colleagues. I was also responsible for onboarding new employees and implementing new work routines, which strengthened my leadership and problem-solving abilities.

Other Work Experience | 2017 - 2022

Since 2017, I have consistently held full-time positions or worked alongside my studies. My previous roles include waitress, animal caretaker, sales associate, childcare worker, and goods receiver.

Education

NBI / handelsakademin

Frontend Developer | 2023 - Present
