About Me

I’ve always had a strong interest in building things. You’ll often find me doing activities like crafting a desk, knitting a shawl, or working on frontend solutions. What motivates me is when what I’ve built has a clear, creative, and user-friendly design – that’s something I’m truly passionate about.

Tekniker & verktyg

HTML, CSS, Figma, usability test JavaScript, TypeScript, React, Vite, Next.js, SCSS, Figma, Node.js, Express, REST API, MongoDB, Firebase, Firestore, Cypress, Jest, Git, GitHub, Azure DevOps, Zustand, Konva.js.

Work Experience

Nexer AB | November 2024 – June 2025

Frontend Developer Intern

Worked with frontend development using Next.js, TypeScript, SCSS, and Zustand. During my internship, I contributed to launching a newsletter builder tool, focusing on everything from building reusable and modular components to syncing frontend with backend. I was part of an agile team and actively participated in standups, code reviews, and sprint planning. For version control, pull requests, and managing user stories, we used Azure DevOps.

Hornbach | 2019- present

Goods receiver | TeamLeader | Sales associate

Responsible for goods reception, product flow, and logistics, as well as leading the team in daily operations. In this role, I developed my ability to organize, structure, and solve problems in a flexible way. I was also responsible for onboarding new employees and implementing work routines, which strengthened my leadership and communication skills.

Other Work Experience | 2017 - 2022

Since 2017, I have consistently held full-time positions or worked alongside my studies. My previous roles include waitress, animal caretaker, sales associate, childcare worker, and goods receiver.

Education

NBI / handelsakademin | 2023 - 2025
